Profile

Physics student passionate about **Python programming** and **data visualization**.

Curious, hands-on learner who enjoys using code to understand and represent real-world phenomena clearly and creatively.

Interested in applying physics concepts to real-world problems through programming, numerical computation, and visualization.

Education

Kaliyaganj College — *B.Sc in Physics (Pursuing)*

Expected Graduation: 2028

Skills

 **Programming:** Python, C

 **Tools & Environments:** VS Code, Jupyter Notebook, Anaconda, GCC

 **Interests:** Computational Physics, Data Visualization

Projects

- **Gravitational Force Calculator** — Python project that computes and visualizes gravitational force between two objects based on Newton's law.
- **Sin Value Calculator** — Small Python script using math modules for converting **angles** to degrees.

Beyond Coding

When I'm not studying or writing code, you'll usually find me:

-  Watching anime (*That Time I Got Reincarnated as a Slime*)
-  Playing games (*mainly Genshin Impact*)
